FOREWORD

FOR the past several years, we have specialized in the production of Chrysanthemum rooted cuttings.

Our stock plants are all field-grown. It is absolutely impossible to secure first quality cuttings from plants that have been weakened by producing flowers. If your stock is infested with midge, or is in a run-down condition, it is certain that it will be profitably replaced by the stock which we have to offer.

In addition, every one of our cuttings is put through an insecticide bath before being placed in the sand. They are again dipped in insecticide before they are packed for shipment. Accordingly, we guarantee every cutting sent out by us to be free of all insect pests and diseases, to be well rooted, and of the highest quality.

Furthermore, our greatly improved method of packing makes it certain the stock will reach you in perfect condition, provided there is no delay in transit. Should any such delay occur, we urge you to notify us immediately.

All claims for damages must be entered against the carrier by the buyer, as we cannot be responsible for plants frozen in transit, or injured by delayed deliveries or rough handling.

Prices in this list are for rooted cuttings. We sell 25 of a variety at the hundred rates and 250 of any one variety at the thousand rates. Below are listed the several rates per hundred, and opposite each rate is indicated the corresponding rate per ten:

RATE PER 100	RATE PER 10
\$3.00	\$0.50
4.00	.50
5.00	1.00
6.00	1.00
10.00	1.50
12.00	2.00

Special discounts on orders of 5,000 or more, with additional discounts on all such orders placed before March 1, 1936.

TERMS OF SALE

Orders from unknown parties must be accompanied by cash or satisfactory references.

We agree to furnish good stock, packed in the most improved manner, and deliver same to Express Company or Post Office, after which all stock must travel at buyer's risk.

While we exercise great care to keep plants true to name, we give no warranty, expressed or implied, nor can we be responsible in any way for the crop, either as to variety or product.

10 per cent. discount for cash with order. 2 per cent. if paid in 10 days. All bills are due on the first day of the month following the date of shipment.

OUTSTANDING NOVELTIES OF 1936

TAGOYA (DePetrís)—An outstanding single producing rigid, well formed sprays with flowers of excellent substance. Its color is a brilliant Goya—red overlaid with a rose sheen forming a brilliant and very attractive combination.

Its habit of growth is very sturdy but somewhat dwarf, making the variety suitable for pot plants. The variety is very productive and does not require disbudding.

Tagoya was awarded the Chrysanthemum Society of America Silver Medal for the best undisseminated single for 1935 and has been admired by all who have seen it.

Matures November 1st to 5th.

Price: \$15.00 per 100, \$125.00 per 1000.

BEUNETTA (DePetrís)—A large button pompon flowering in late November. It produces rigid, well flowered sprays of many bronze flowers tipped with gold.

It is desirable because it is different from any other variety which comes into bloom at this time.

A sturdy grower and a good producer.

Price: \$15.00 per 100, \$125.00 per 1000.

TOM PEARSON (DePetrís)—A late midseason spray pompon of unusually productive and sturdy habit of growth with rigid stems carrying well flowered sprays.

Its color is an intense deep gold, the full center forming an emerald gold cast producing a very attractive contrast. Flowers possess excellent substance as well as fulness.

Because of its color, substance and productiveness we predict this variety will be grown in great quantities despite its midseason-flowering habit.

Price: \$15.00 per 100, \$125.00 per 1000.

ORCHID BEAUTY (DePetrís)—An unusually attractive anemone with very rigid habit of growth and perfect spray formation requiring no disbudding.

The color is most unusual, being an intense orchid with a light golden cushion.

It matures about the middle of November and is distinct from any other anemone flowering at that time. Winner of the Chrysanthemum Society of America Silver Medal in 1935.

Price: \$15.00 per 100, \$125.00 per 1000.

DEPETRIS INTRODUCTIONS OF 1935

PRINCETON—This is a large flowering spray pompon with many superlative qualities. It carries from four to six blooms three inches in diameter, in strong well-formed sprays that do not crowd the flowers.

Its color is a beautiful and distinct shade of orange of great brilliancy. It has perfect stems and foliage, and is a sturdy grower, attaining a height of four feet.

It matures November 20th, and can be held for Thanksgiving.

This variety was awarded the A. C. S. Silver Cup for the best seedling pompon for 1934.

VALENCIA—One of the loveliest singles ever introduced. Its color is a very beautiful shade of brilliant Valencia pink, without any trace of the undesirable magenta. It never fades. The flowers are large, measuring over four inches in diameter.

It is a strong grower, reaching a height of four feet. The sprays are very well arranged, carrying from four to seven flowers without crowding, and need no disbudding.

The date of maturity is November 30th, but will continue to cut until Christmas if kept cool.

Undoubtedly, this variety will become one of the most popular, and we have no hesitancy in recommending it very highly.

SUNNY BOY—A single, similar to Valencia, except that it is a bright yellow color. The individual blooms are smaller.

It is almost the equal of Valencia in habit of growth and substance, and requires no disbudding. Date of maturity November 25th.

CAMPFIRE—A spray pompon of very prolific habit, carrying from five to seven blooms on well-formed sprays.

It is a strong grower, attaining a height of over four feet. In color it is a crimson bronze, and is a fine keeper. Matures November 25th.

Price: \$7.00 per 100, \$65.00 per 1000.
